About Trimetis

Trimetis is an international Consulting, IT-services and Sourcing Company. Established by senior experts with a long track record in large international consulting firms, the group is focused on delivering high-quality services for clients around the globe, with a special focus on Central and Eastern Europe. Our customers are global top brands across various industries, and we help them developing top products with latest technologies.

For our operations in **Lublin** we are currently looking for smart professionals for the position as

Software Testing & Quality Assurance Engineer [m/f]

Your tasks

As a software testing & quality assurance engineer, you are not only responsible for testing software developed by an inhouse team, but you also oversee the entire development process, which includes software testing, from start to finish. You are an important part in the whole software quality assurance lifecycle and are - together with your team - responsible that all implemented new features in one of our products adhere to our quality standards.

Your Responsibilities

❖ Active part in the definition of our software quality assurance lifecycle
❖ Definition, implementation and execution of automated and manual tests
❖ Ongoing enhancement of the test suite
❖ Drafting and implementation of (new) test strategies
❖ Testing of web applications
❖ Enlargement of testing environment and infrastructure
❖ Close collaboration with the development team and product management

Your qualifications

❖ Technical education and solid technical knowledge (e.g. University degree, etc.)
❖ Experience with testing web applications either manually or automatically
❖ Experience in defining a test plan (concept, test cases, etc) is beneficial
❖ Interested in web application security

- ❖ Good command of English language (spoken and written)
- ❖ Accurate and reliable work style
- ❖ Experience with Ruby, Python or any other object-oriented programming languages are beneficial

What you can expect from us

- ❖ Working at the cutting edge of Software Development

- ❖ International clients with challenging projects

- ❖ International software development teams with distributed delivery groups

- ❖ Possibility to work abroad, in case desired (optional offer)

- ❖ Favourable working atmosphere in an expanding company

- ❖ Attractive remuneration

- ❖ Flexible working hours

- ❖ Private healthcare

- ❖ Business English lessons (during working hours)

- ❖ Integrational meetings & events

- ❖ Multisport card
